Projects

Pujam Pandal Phase 2 (OnGoing)

- **Description:** Developed an online booking application facilitating reservations for temple visits, pujaris, and associated religious services, enhancing accessibility and convenience for devotees.
- **Role:** Implemented a system showcasing nearby temples, pandits, and available religious services, enhancing accessibility and convenience for users seeking spiritual guidance and participation in rituals.
- **Skills:** React js

Solid Waste Management Phase 2 (OnGoing)

- **Description:** Enhanced waste collection efficiency and transparency by implementing intelligent route planning, GPS tracking, and QR code scanning for collection vehicles, optimizing operations and ensuring accountability.
- **Role:** Implemented streamlined waste management lifecycle to ensure efficient collection, transportation, and reporting, enhancing overall operational effectiveness.
- **Skills:** React.JS

ProhealthI (OnGoing)

- **Description:** ProhealthI is a Multifaceted Medical Insurance project comprising various modules tailored to meet the diverse needs of the healthcare industry. Thought its exceptional features, such as Exceptional List, Third Party Pricing and Adminstrator Modules. ProhealthI endeavours to provide an unparalleled user experience, prioritizing well-being of its customers and ensuring a seamless healthcare journey. By leveraging technology and innovation across different modules, aims to redefine the Insurance landscape, revolutionizing healthcare access and management for organizations.
- **Role:** Understanding the application thoroughly with the help of BRS/SRS (Baseline Document). I designed intuitive interfaces for Insurance comprising to the users.
- **Skills:** React js

Pujam Pandal Phase 1

- **Description:** Aimed to streamline the administration of temple visits, pandit reservations, and associated religious services through a comprehensive admin dashboard. This platform served as a centralized hub for overseeing bookings, managing ratings, sending push notifications, and conducting online laddu biddings, thereby enhancing the efficiency and effectiveness of temple operations.
- **Role:** Within this project, my primary responsibility was to architect and implement key features of the admin dashboard. Leveraging React JS technology, I designed intuitive interfaces for viewing and managing bookings, analyzing ratings, and sending timely push notifications to users. Additionally, I developed a robust bidding system for online laddu auctions, ensuring a seamless and transparent process for devotees participating in this traditional practice.
- **Skills:** React js

IceCream Delight

- **Description:** The IceCream Delight website is a delightful online destination designed to tantalize taste buds and evoke nostalgia with its scrumptious array of ice cream flavors and treats. This website showcases the essence of indulgence and fun, inviting visitors to explore the menu, discover seasonal specials, and learn more about the parlor's commitment to quality and creativity.
- **Role:** As the developer for the IceCream Delight website, my role encompassed crafting a visually appealing and user-friendly online presence using HTML, CSS, JavaScript, and Bootstrap. Leveraging these technologies, I meticulously designed and implemented each page, ensuring seamless navigation and engaging content presentation. From styling the layout with CSS and Bootstrap to adding interactive elements with JavaScript, I aimed to create an immersive experience that captures the essence of the ice cream parlor's charm and flavors.
- **Skills:** HTML, CSS, JavaScript, and Bootstrap
